Matthew Leighton

Mossman Postdoctoral Fellow, Yale University

Education

2020–2024 **Ph.D. in Physics**, *Simon Fraser University*, Burnaby, Canada

- **Thesis:** *Stochastic Thermodynamics of Multi-Component Molecular Machines*, supervised by Prof. David Sivak.

2016–2020 **B.Sc. Honours in Physics and Mathematics**, *Dalhousie University*, Halifax, Canada

- **Honours Thesis:** *Modelling the Formation of Cross-Linked Collagen Fibrils*, supervised by Prof. Andrew Rutenberg.
- Middle-Distance Runner with the Varsity Track & Field Team (2016-2018)
- Choral Scholar with the University of King's College Chapel Choir (2016-2020)

2019 **Exchange Term studying Mathematics, Statistics, and Finance**, *Chalmers University of Technology*, Göteborg, Sweden

Experience

Research

2024 – **Mossman Postdoctoral Fellow**, *Department of Physics and QBIO Institute*, Yale University

Independent researcher studying the physics of biological systems across scales through the lens of nonequilibrium thermodynamics and information theory. Areas of interest include molecular machines, mitochondrial geometry, bacterial chemotaxis, hierarchical protein fibers, neuronal systems, and animal behavior. Working with Professors Lynn, Machta, Clark, and Emonet.

2025 – **Guest Researcher**, *Center for Computational Biology*, Flatiron Institute

Collaborating with experts on molecular dynamics and Cryo-EM to study the nonequilbrium thermodynamics of rapid cooling processes used in Cryo-EM.

2020–2024 **Graduate Researcher**, *Sivak Group*, Simon Fraser University

Worked with professor David Sivak, analyzing biological molecular machines using the theory of nonequilibrium statistical mechanics. Research included deriving fundamental physical limits on molecular machine performance, inferring hidden thermodynamic quantities in biological molecular machines, and uncovering design principles for nanoscale machinery.

2018–2020 **Undergraduate Researcher**, *Rutenberg Group*, Dalhousie University

Worked with professor Andrew Rutenberg on various research projects in theoretical biophysics using computational and mathematical methods. Research included modelling stochastic effects in the process of host cell invation by *S. Typhimurium* bacteria, developing models for *in vivo* collagen fibril growth, structure, and mechanics.

Teaching

2021-2022 **Teaching Assistant**, *Department of Physics*, Simon Fraser University

- Teaching assistant for undergraduate (PHYS 132 and PHYS 344) and graduate (PHYS 801) courses.
- Responsibilities included helping to run lab sessions and grading lab reports (PHYS 132), leading tutorials and grading assignments (PHYS 344), and running peer review sessions and providing feedback on graduate student research presentations (PHYS 801).
- Received the Fall 2021 Physics TA Teaching Award for outstanding teaching efforts.

Guest Lectures on Introductory Stochastic Thermodynamics

- SFU undergraduate thermodynamics course (2022), Janelia Research Campus biophysics workshop (2023), and Yale QBio Institute Workshop Series (2026).

New Haven – Connecticut – United States of America
matthew.leighton@yale.edu • *www.matthewleighton.com*

Industry

2025 – **Scientific Advisor**, *Impossible Fibers Lab*, Astera Institute
Providing a biological physics perspective for a new experimental lab working to develop open-source tools for advanced biomanufacturing of protein fibers. Lead development of experiment-informed statistical physics models for the self-assembly, structure, and mechanics of hierarchical protein fibers as part of a DARPA-funded project.

2021-2022 **Co-Founder**, OnDeck Fisheries AI Inc.
Co-founded a tech startup with the mission of bringing modern computer vision technology to bear on longstanding problems in the fisheries monitoring industry. Led efforts to raise more than $200,000 in non-dilutive funding in the company's first year of incorporation.

2017–2018 **Business Analyst**, *Inetco Systems LTD*, Vancouver, Canada
Led the planning process for the release of a major new cloud SaaS product; wrote and presented the business plan at a quarterly board meeting for board approval. Performed financial modelling and analysis, managed marketing campaigns, and communicated requirements to the software team.

Presentations

Invited Talks (13)

Jun 2026 **American Physical Society DSNP klogW Seminar (virtual)**
Mar 2026 **American Physical Society March Meeting**
Jan 2026 **Department of Chemistry, Northwestern University**
Oct 2025 **Tom Ouldridge Group Meeting, Imperial College London**
May 2025 **Department of Physics, Dalhousie University**
Oct 2024 ***Biophysics Seminar*, Simon Fraser University**
Jan 2024 ***Center for Computational Biology*, Flatiron Institute**
Jan 2024 **National Institute for Theory and Mathematics in Biology**
Jan 2024 **Santa Fe Institute**
Dec 2023 ***Center for the Physics of Biological Function***, Princeton University
May 2023 **Biophysical Society of Canada Annual Meeting**
May 2023 **Aidan Brown Group Meeting, Toronto Metropolitan University**
Jul 2022 **Shoichi Toyabe Group Meeting, Tohoku University (virtual)**

Contributed Talks (17)

May 2026 **Information & Decisions Across Scales Workshop, Max Planck Institute for Physics of Complex Systems.**
Mar 2026 **American Physical Society March Meeting**
Mar 2025 **American Physical Society March Meeting**
Mar 2024 ***GSNP Student Speaker Award Session* at the American Physical Society March Meeting**, ★ Selected for talk award.
Oct 2023 **Junior Scientist Workshop on Theoretical Biophysics at *Janelia Research Campus***

Jul 2023 **Frontiers in Biophysics**, ★ Selected for talk award.

Mar 2023 **American Physical Society March Meeting**

Nov 2022 **Physics of Life: Students and Postdocs Edition Symposium at the *Center for the Physics of Biological Function***

Jun 2022 **Frontiers in Biophysics**

May 2022 **Workshop on Stochastic Thermodynamics III, *hosted by the University of Tokyo (virtual)***

Jun 2021 **Frontiers in Biophysics**

Nov 2020 **Canadian Collagen Cafe (virtual)**

Jun 2020 **Soft Matter Canada Symposium**

Mar 2020 **APS March Meeting (via DSOFT Virtual Meeting)**

Jan 2020 **Atlantic Undergraduate Physics Conference**, ★ Selected for talk award.

Nov 2019 **Canadian Undergraduate Physics Conference**

Aug 2018 **Dalhousie Bioblast Symposium**

Selected Posters (9)

Apr 2026 **Workshop on Information Processing in Biological Networks at the *Flatiron Institute***

Jan 2026 **Berkeley Stat Mech Meeting**

Jan 2025 **Gordon Research Conference on Stochastic Physics in Biology**, ★ Selected for poster award.

Jan 2025 **Berkeley Stat Mech Meeting**, ★ Selected for poster award.

Oct 2023 **Junior Scientist Workshop on Theoretical Biophysics at *Janelia Research Campus***

May 2023 **Biophysical Society of Canada Annual Meeting**

Jan 2023 **Gordon Research Conference on Stochastic Physics in Biology**

Jan 2023 **Berkeley Stat Mech Meeting**

May 2021 **Biophysical Society of Canada Annual Meeting**, ★ Selected for poster award.

Grants, Fellowships, Awards, and Scholarships

Research Support

2024-2025 **DARPA HR0011-25-3-0046 "Modeling Hierarchical Fiber Formation"**

- $100,000 USD over 6 months. Co-investigator with Tim McGee (Speculative Technologies and Astera Institute), Ashwin Samudre (Allen Institute), and John Frampton (Dalhousie University and 3DBioFibR).

Research Fellowships and Awards

2025-2027 **NSERC Postdoctoral Fellowship**, *Natural Sciences and Engineering Research Council of Canada*

2024-2027 **Mossman Postdoctoral Fellowship**, *Yale University*

2024-2027 **Complexity Postdoctoral Fellowship *(declined)***, *Santa Fe Institute*

2024-2027 **NITMB Postdoctoral Fellowship *(declined)***, *National Institute for Theory and Mathematics in Biology*

2022-2024 **NSERC CGS-Doctoral Fellowship**, *Simon Fraser University*

2020–2021 **NSERC CGS-Masters Fellowship**, *Simon Fraser University*

2018,2020 **NSERC USRA (x2)**, *Dalhousie University*

Service, Presentation, and Paper Awards

2026 **3rd Place Prize**, *Astera Institute Metascience Essay Competition*

2025 **Springer Thesis Prize**, *Springer Nature*

2025 **Poster Award**, *Gordon Research Conference on Stochastic Physics in Biology*

2025 **Poster Award**, *Berkeley Stat Mech Meeting*

2024 **1st Place Student Speaker Talk Award** , *American Physical Society Group on Statistical & Nonlinear Physics*

2023 **2nd Place Talk Award**, *Frontiers in Biophysics*

2023 **Trainee Paper Award**, *Biophysical Society of Canada*

2021 **TA Teaching Award (PHYS 132)**, *SFU Physics*

2021 **Poster Award**, *Canadian Biophysical Society*

2020 **Theory Talk Award**, *Atlantic Undergraduate Physics Conference*

Academic Scholarships and Awards

2025 **Dean's Convocation Medal**, *Simon Fraser University*

2024 **Michael and Jenifer Thewalt Graduate Award**, *Simon Fraser University*

2022 **Hargreaves Scholarship**, *Simon Fraser University*

2022 **Howard Malm Graduate Scholarship**, *Simon Fraser University*

2021 **Kirk H. Michaelian Graduate Scholarship**, *Simon Fraser University*

2020–2021 **BC Graduate Scholarship**, *Simon Fraser University*

2016–2020 **Chancellor's Scholarship**, *Dalhousie University*

2016–2018 **USports Academic All-Canadian**, *Dalhousie University*

2017 **Archibald Physics Prize**, *Dalhousie University*

2016–2020 **Dean's List**, *Dalhousie University*

Other (non-academic)

2022 **1st place**, *University of Washington Dempsey Startup Competition*
with OnDeck Fisheries AI Inc.

2022 **2nd place**, *WashU Olin's Big IdeaBounce Startup Competition*
with OnDeck Fisheries AI Inc.

2016–2020 **Helen Roby Choral Scholarship**, *University of King's College*

Service

Journal Peer Review (16 total)

(2x) Physical Review Letters, Physical Review X, Physical Review Research.

(1x) Physical Review E, PNAS, Nature Nanotechnology, Nature Communications, Nature Reviews Physics, Journal of Statistical Mechanics: Theory and Experiment, European Physics Journal E, Theory in Biosciences, Symmetry, Biomimetics, Minerals.

Grant Peer Review (1 total)

(1x) Institute of Physics of the Polish Academy of Sciences

Mentoring (3x Graduate Students, 4x Undergraduates)

Winter 2026 – Present **Zimo Li**, Ph.D. student in the Lynn Group
- Supervising a research project involving estimating mutual information in high-dimensional neural datasets. A manuscript based on Zimo's work is currently in preparation.

Spring 2025 – Present **Jose Betancourt**, Ph.D. student in the Machta Group
- Working together on theory for information-limited control with applications to microbial navigation. Our work has led to two preprints, one on which Jose is first author.

Spring 2025 – Winter 2026 **Yuchang Tian**, M.Sc. student in the Lynn Group
- Supervised a project numerically optimizing positional information encoding by place cells in the hippocampus. A manuscript based on Yuchang's work is currently in preparation.
- Next: PhD student, Neuroscience, UT Austin.

Summer 2024 – Winter 2026 **Julián Jiménez-Paz**, Summer Research Intern in the Sivak Group
- Formulated and supervised a project analyzing the thermodynamics of sodium-potassium Pumps. A manuscript based on Julián's work has been published in Physical Review Research.
- Next: PhD student, Physics, Cornell University.

Summer 2023 – Spring 2024 **Graham Rich**, Undergraduate Honours Thesis in the Sivak Group
- Formulated and supervised a project investigating free energy flows between chemical and mechanical degrees of freedom in flashing ratchet models for molecular motors.
- Next: BSc student, Physics and Mathematics, Simon Fraser University.

Summer 2023 **Juan Carlos Pérez Ramírez**, Summer Research Intern in the Sivak Group
- Formulated and supervised a project investigating the effect of the gearing ratio between coupled rotary motors on output power and efficiency.
- Next: BSc student, Physics, Universidad de Guanajuato.

Summer 2022 **Lilian Paty**, Summer Research Intern in the Sivak Group
- Formulated and supervised a project investigating comparisons between discrete and continuous models for molecular motors.
- Next: MSc student, ESPCI Paris.

Conference Roles and Outreach

March 2026 **Session Chair**, *DSNP Session "Nonequilibrium Statistical Physics"*, APS March Meeting

Fall 2025 **Abstract Sorter**, *APS March Meeting*, Division of Statistical and Nonlinear Physics

Summer 2024 **Panelist**, *APS DBIO Webinar*, "Transition from Graduate School to Postdoc"

Summer 2024 **Poster Judge**, *Frontiers in Biophysics*, Vancouver, Canada

Spring 2022 **Organizer**, *Frontiers in Biophysics*, Vancouver, Canada
- Member of the organizing committee for Frontiers in Biophysics 2022, a conference run by and for graduate students in biophysics and related areas in the Pacific Northwest. Conference was held in person in downtown Vancouver, with 85 attendees.

Spring 2022 **Talk Judge**, *SFU Postdoc Research Symposium*, Burnaby, Canada

Fall 2021 **Talk Judge**, *Canadian Undergraduate Physics Conference*, Toronto, Canada (Virtual)

Summer 2018,2019 **Science Outreach**, *Dalhousie University*, Halifax, Canada
- Led interactive physics experiment demonstrations as part of the Discovery Days outreach program for elementary and high school students.

Miscellaneous Qualifications

Grade 8 Piano and Advanced Music Theory, *Royal Conservatory of Music*

DELF B2, *French language Certification (fluent)*

CSIA Level 1 Ski Instructor, *Canadian Ski Instructors Alliance*

AST 1 Avalanche Skills, *Avalanche Canada*

Emergency First Aid, CPR-C, and Bronze Cross, *Canadian Lifesaving Society*

Cansail 4, *Sail Canada*
